

Abstract

Title: Attitudes to the aggressive manifestations of SK Slavia Praha

Objectives: The main goal of this thesis is to analyse attitudes to the aggressive manifestations of SK Slavia Praha and describe differences between fans who actively participate on foible and those who only watch the matches.

Methods: In this thesis is used quantitative method of questioning. The answer sheet was placed on two internet websites among fans of SK Slavia Praha.

Results: I found out that the most different opinion between fans is on batting pyrotechnics and the greatest conformity is about whistle and also measure of aggressive behaviour on different football clubs.
